

Holiday giving? African Hospital Electrical Project

www.healthservicecorps.org/author/cummings/

Dear friend,

We are the only doctors (EM and OBGYN) in a 200-bed rural district hospital in Angola, AFRICA. Thank you for your support of our water project, which is making progress! We now have a solar pump providing water, and have one of three reservoir tanks renovated and in use. We continue to seek progress in our hospital's essential functions, and hope to create a power supply that is consistent 24/7 for vital areas of the hospital, including the operating room. This will include solar power and an integrated system with generator power.

Would you consider a **different type of holiday gift** and help supply the hospital with electricity for the next year?

Consider supporting our project with a \$50, \$200, \$500 even \$1000 donation!
Our goal of \$40,000. Below are some images of our reality and need.

Together with you in caring for others,
Drs Daniel and Priscila Cummings

1. Our electrical main frame
2. Solar powered water pump
3. Patient and baby who survived uterine and bladder rupture
