

Greetings!

Thank you for praying for Sue Johnston last week.

She returned on Sunday night as planned from Real Hope for Haiti.

She was able to complete the training once the baggage finally arrived and she had the analyzer!

We're thankful for her flexibility!

Their lab is in a small space, and the photos below show they are using it to the max!

Sue had a "small world story" for us when she returned!

She was seated on the plane next to a doctor

When the couple Sue was seated with on the plane learned what she had been doing in Haiti and was with WWLAB, they discovered the connection!

The couple was Dr. and Mrs. Agamah from International Health Development Network (IHDN) in Ghana!

Garry and James have both brought equipment and training to their hospital.

Please remember also to pray for Barb, who leaves from Charlotte NC early tomorrow morning for Every Eye Will See Him ministries, also in Haiti though nearer the CAP airport in the north.

Barb will set up a lab for Every Eye Will See Him Ministries' Cathy Pearson Memorial Clinic.

She will leave on the 26th and return July 2.

There is more information about their work at www.eewsh.org

The hematology analyzer that arrived on Day 2 -

The Chemistry analyzer (black one) and associated equipment brought by James last year -

The Electrolyte analyzer brought by James last year -

Other equipment brought on brought by James last year -

Area for staining slides for microscopy -
